NUMBER 1

CUTTING STOCK: GEOMETRIC RESOURCE ALLOCATION

Y. Lirov	vii Preface
R. W. Haessler	1 One-dimensional Cutting Stock Problems and solution procedures
F. J. Vasko, F. E. Wolf, K. L. Stott and O. Ehrtam, Jr.	9 Bethlehem Steel combines cutting stock and set covering to enhance customer service
R. E. Johnston	19 Dimensional efficiency in cable manufacturing problems and solutions
M. P. Reinders	37 Cutting stock optimization and integral production planning for centralized wood processing
H. Lutfiyya, B. McMillin, P. Poshyanonda and C. Dagli	57 Composite stock cutting through simulated annealing
A. A. Farley	75 Limiting the number of each piece in two-dimensional cutting stock patterns
D. D. Gemmill	89 Solution to the assortment problem via the genetic algorithm
M. Dincbas, H. Simonis and P. Van Hentenryck	95 Solving a Cutting-Stock Problem with the constraint logic programming language CHIP
Y. Lirov	107 Knowledge based approach to the Cutting Stock Problem

NUMBER 2

E. Y. Rodin	1 Speed of publication—An editorial
S. Chakravarty and A. Datta	3 Dynamic response of stenotic blood flow <i>in vivo</i>
P. Glaister	21 A finite difference scheme for inviscid flows with non-equilibrium chemistry and internal energy
H. Pham	29 Optimal design of hybrid fault-tolerant computer systems
S. Chakravarty and A. Datta	35 Pulsatile blood flow in a porous stenotic artery
A. Menendez and B. Feiring	55 Utilizing risk minimization for portfolio management
G. R. Waissi	65 A new Karzanov-type $O(n^3)$ max-flow algorithm

T. Pham-Gia and N. Turkkan	73 Determination of the Beta distribution from its Lorenz curve
Y. Cherruault, G. Saccomandi and B. Some	85 New results for convergence of Adomian's method applied to integral equations
E. Y. Rodin, Y. Wu and S. Massoud Amin	95 Character recognition: Qualitative reasoning and neural networks
M. H. N. Tabrizi and J. B. Edwards	105 The analytical modelling and dynamic behaviour of tray-type binary distillation columns
N. J. H. Gellie	131 Errata to "Improving models within PREPLAN—A description of the current system and what is needed"

NUMBER 3

E. Y. Rodin	1 Speed of publication—An editorial
D. W. Reid and K. L. Teo	3 Optimal control problems with fuzzy system parameters
N. Viswanadham, Y. Narahari and T. L. Johnson	15 Stochastic modelling of flexible manufacturing systems
C. Pahl-Wostl	35 Information theoretical analysis of functional temporal and spatial organization in flow networks
T. Artikis, D. Jerwood and A. Voudouri	53 Analytical and simulation techniques for discounting binomial random sums
H. Gzyl and R. Jimenez	59 From heat equations to wave equations: More on transmutation operators
D. S. Dendrinos	63 Evolution of a ring-attractor in socio-spatial dynamics
R. K. Pearson	71 Fitting straight lines to poor quality (x,y) data
D. C. Brauer and G. Naadimuthu	81 A goal programming model for aggregate inventory and distribution planning
C. Y. Wang, J. B. Bassingthwaight and L. J. Weissman	91 Bifurcating distributive system using Monte Carlo method
G. S. Ladde and S. Sathananthan	99 Stability of Lotka-Volterra model
B. R. Wienke	109 Modeling phase volume constraints under repetitive decompression
W. Krassowska, T. C. Pilkington and R. E. Ideker	121 Two-scale asymptotic analysis for modeling activation for periodic cardiac strand
A. Belleni-Morante	131 A mathematical model for particle transport with mollified boundary conditions

NUMBER 4

E. Y. Rodin	1	Speed of publication—An editorial
A. E. Ali	3	Finite element technique versus polynomial solutions in parallax bar heighting from space photography
P. R. Steffens and D. N. P. Murthy	11	A mathematical model for new product diffusion: The influence of innovators and imitators
M. G. Zavattaro	27	Asymptotic analysis of singularly perturbed random dynamical systems
H. Greiner	41	An algorithm for linearly constrained programs with a partly linear objective function
H. El Ouizgani	51	Application of the minimisation methods in biological oceanography: Identification of the grazing curve's coefficients
W. L. Chan and B. Z. Guo	57	Age-dependent population dynamics based on parity interval progression
L. Egghe	69	Theory of search keys and applications in retrieval techniques used by catalogers
G. K. Adil, R. G. Kasilingam and S. M. Taboun	91	Simulating the effects of part families in flexible manufacturing systems
I. H. Farag, G. M. Buzzell and G. Phetteplace	105	Microcomputer analysis of solid/liquid phase change heat transfer
S. Rathnam and T. Madhavan	115	An interactive graphics based visual modelling tool
J. A. Nelder	131	Modelling in statistics

NUMBER 5

E. Y. Rodin	1	Speed of publication—An editorial
Y. Yavin and C. Frangos	3	Optimal control of some queueing networks
S. Wasylkiewicz	13	The application of the substitute objective function minimization for solving multi-stage separation problems
D. Sudharshan and J. H. May	27	GLOBESTRAT: Designing product lines for global markets
L. Preziosi, G. Teppati and N. Bellomo	37	Modeling and solution of stochastic inverse problems in mathematical physics
A. Nagurney and A. G. Robinson	53	Algorithms for quadratic constrained matrix problems
W. Seidel	67	The influence of an estimation procedure on the performance of the (u, γ) -sampling scheme in statistical quality control

E. Y. Rodin, S. M. Amin and C. Ruan	77	Collision avoidance and low-observable navigation in a dynamic environment
M. D. Troutt and S. K. Tadisina	99	The Analytic Hierarchy Process as a model base for a merit salary recommendation system
A. Chronopoulos, P. Michalopoulos and J. Donohoe	107	Efficient traffic flow simulation computations
Y. Shen, A. E. Hoerl and W. McConnell	121	An incomplete design in the analytic hierarchy process
M. H. N. Tabrizi and J. B. Edwards	131	Modelling short packed and tray-type distillation columns for controller design
J. Spanier	147	Modeling—A personal viewpoint

NUMBER 6/7

MATHEMATICAL MODELS IN MEDICINE VOLUME 5

M. Witten	vii	Preface
R. Allkin, R. J. White and P. J. Winfield	1	Handling the taxonomic structure of biological data
R. P. Bolender and J. M. Bluhm	11	Database literature review: A new tool for experimental biology
V. Brendel	37	PROSET—A fast procedure to create non-redundant sets of protein sequences
W. J. Clapham and C. J. Crosby	45	Utility of object-oriented programming in complex system modeling
S. M. Dunn, J. Fedyna and J. E. Peters	51	Efficient parallel implementation of sequence analysis algorithms using a global address space model
L. Hunter	79	Knowledge acquisition planning: Using multiple sources of knowledge to answer questions in biomedicine
G. M. Keen, G. W. Redgrave, J. R. Lawton, M. J. Cinkosky, S. K. Misra, J. W. Fickett, and C. Burks	93	Access to molecular biology databases
J. Li	103	Effects of behavior change on the spread of AIDS epidemic
G. Markowsky, M. Gershman and J. Hunter	113	Phage typing sets

M. A. McClure	121	Sequence analysis of eukaryotic retroviral proteins
S. Salvini and M. H. Williams	137	Central knowledge management for expert systems
J. Sticklen and R. Tufankji	145	Utilizing a functional approach for modeling biological systems
F. (van Bockstaele) Lisacek	161	Explanation for the non-specificity of small peptide-antibody interaction
M. M. Y. Waye	179	A database of DNA cloning vectors organized in a functional hierarchy using a Macintosh program
D. J. Weiner	185	Expert systems to aid in the formulation of hypotheses and design of experiments in biomedical research
R. J. White and R. Allkin	199	A language for the definition and exchange of biological data sets
A. Wohlgemuth and D. P. Dubey	225	The effects of symbolic bias in the science of immunogenetics—Prediction and confirmation in alternative models
A. N. Zaretzky and C. A. Leguizamon	237	The Heyting arrow lattice for qualitative relations in biological systems
S. Barron, M. Witten, G. Liu	245	A bibliography on computational molecular biology and genetics

NUMBER 8/9

FORMAL THEORIES OF POLITICS II: MATHEMATICAL MODELLING IN POLITICAL SCIENCE

P. E. Johnson	1	Formal theories of politics II: The research agenda
----------------------	---	---

FORMAL THEORY AND NORMATIVE ANALYSIS

S. J. Brams and P. C. Fishburn	15	Coalition voting
J. J. Bartholdi, III, C. A. Tovey and M. A. Trick	27	How hard is it to control an election?
N. Schofield and C. A. Tovey	41	Probability and convergence for supra-majority rule with Euclidean preferences
G. Tullock	59	Computerizing politics

EMPIRICAL ANALYSIS OF THE SPATIAL MODEL

J. W. Endersby and M. J. Hinich	67	The stability of voter perceptions: A comparison of candidate positions across time using the spatial theory of voting
--	----	--

- K. T. Poole, F. B. Sowell and S. E. Spear** 85 Evaluating dimensionality in spatial voting models

GAME THEORY

- J. H. Aldrich and W. T. Bianco** 103 A game-theoretic model of party affiliation of candidates and office holders
- C. M. Cameron and J. M. Enelow** 117 Asymmetric policy effects, campaign contributions and the spatial theory of elections
- J. E. Harrington, Jr.** 133 Modelling the role of information in elections
- D. E. Ingberman** 147 Incumbent reputations and ideological campaign contributions in spatial competition
- J. M. Snyder, Jr. and Y. Lim** 171 Political payoffs and the electoral advantages of incumbency
- P. T. Spiller** 185 Agency discretion under judicial review

DYNAMIC MODELS

- W. W. Hill** 201 Several sequential augmentations of Richardson's arms race model
- A. M. Saperstein** 213 Are democracies more or less prone to war? A dynamical model approach
- R. Huckfeldt and C. W. Kohfeld** 223 Electoral stability and the decline of class in democratic politics

ARTIFICIAL INTELLIGENCE

- G. Duffy** 241 Concurrent interstate conflict simulations: Testing the effects of the serial assumption

NUMBER 10

- E. Y. Rodin** 1 Speed of publication—An editorial
- S. Nakamori** 3 Estimations of signal and parameters using covariance information in linear continuous systems
- N. S. Papageorgiou** 17 Existence and sensitivity analysis of optimal paths in an economic growth model with infinite planning horizon
- I. Kramer** 25 Mathematically modelling the future AIDS incidence in Maryland
- P. Yu and K. Huseyin** 45 Sensitivity of certain dynamic bifurcations
- J. B. Ghosh and C. E. Wells** 59 Optimal retrieval strategies for carousel conveyors
- A. M. J. Skulimowski and B. F. Schmid** 71 Redundance-free description of partitioned complex systems

M. I. Ignatov and A. B. Pevnyi	93	Surface smoothing with <i>B</i> -spline finite elements
P. Y. H. Pang and R. P. Agarwal	101	Periodic boundary value problems for first and second order discrete systems
R. R. Joshi	113	Estimation of probability and cost functions for antibody production systems
L. D. Flippen, Jr.	121	Abstract Zwanzig model reduction theory with application to discretized linear systems
A. G. Ladde	135	Selecting the best baseball cards for investment
K. R. Yates and D. J. Wollkind	143	The effect of suspended particles on Jeans' criterion for gravitational instability
A. Rèpaci and M. T. Vacca	157	Propagation phenomena in systems of excitable cells—Solution of an inverse problem
C. Betz, H. Gzyl and R. Jiménez	165	Probabilistic approach to wave propagations problems V: A collection of examples
M. Glasner, D. Yevick and B. Hermansson	177	Generalized propagation techniques for longitudinally varying refractive index distributions
D. M. Pettus, N. P. Pettus and H. A. Lim	183	The computer simulation of the life cycle of the Florida bald eagle

NUMBER 11

E. Y. Rodin	1	Speed of publication—An editorial
D. A. Kault	3	Modelling the effects of AIDS on gonorrhea epidemiology
J.-D. Lee, C.-H. Chen, J.-Y. Lee, L.-M. Chien and Y.-Y. Sun	15	The Fibonacci search for cornerpoint detection of two-dimensional images
L. E. Stanfel, P. N. Kumar and L. Stanfel	21	A model for determining the cost-effectiveness of T1 transmission in certain integrated networks
S. S. E. H. Elnashaie, K. M. Wagialla and M. E. E. Abashar	35	The use of mathematical and computer models to explore the advantages of fluidized bed technology for catalytic reactions with equilibrium/diffusional limitations. Ammonia synthesis
S. Wang and K. Huseyin	49	'Maple' analysis of nonlinear oscillations
P. A. Voltairas, C. V. Massalas and I. E. Lagaris	59	Nucleation field of the infinite ferromagnetic circular cylinder at high temperature
F. M. Alhabdan, M. A. Abashar and S. S. E. Elnashaie	77	A flexible computer software package for industrial steam reformers and methanators based on rigorous heterogeneous mathematical models

L. Ingber and B. Rosen	87	Genetic algorithms and very fast simulated reannealing: A comparison
N. Sperelakis, H. Ortiz-Zuazaga and J. E. Mann, Jr.	101	Voltage interaction between sarcolemma and junctional SR membrane
W. Y. Tan and K. P. Singh	117	Some results on the probability distributions of times to pre- AIDS and AIDS
A. de Korvin and R. Kleyle	157	Selecting a set of simultaneous courses of action when imprecision is involved
P. Broadbridge, R. Srivastava and T.-C. Jim Yeh	163	Burgers' equation and layered media: Exact solutions and applications to soil-water flow
L. D. Flippen, Jr.	171	Fundamental law preservation in model reduction

NUMBER 12

E. Y. Rodin	1	Speed of publication—An editorial
A. F. Badalamenti and R. J. Langs	3	Work and force in psychotherapy
J. Carrera	19	Methodological conceptualization of mathematical modelling
B. Krishna Kumar and P. R. Parthasarathy	29	Number of deaths in semi-Markov compartmental system with branching particles
J. A. Nickel	37	Passive detection of moving targets
S. S. E. H. Elnashaie, M. A. Soliman, M. E. Abashar and S. Almuhan	41	Mathematical modelling of diffusion and reaction for gas-solid catalytic systems with complex reaction networks. Negative effectiveness factors
I. Kramer	55	Understanding the time delay between HIV infection and AIDS from a model of HIV's impact on the T-Helper cell density
M. Elia and G. Taricco	61	A note on linear equations modeling birth-and-death processes
B. E. Flores, D. L. Olson and V. K. Dorai	71	Management of multicriteria inventory classification
R. Ott, J. Bijma, C. Hemleben and M. Signes	83	A computer method for estimating volumes and surface areas of complex structures consisting of overlapping spheres
A. Athalye, A. de Sam Lazaro and V. S. Manoranjan	99	Generalized model for a force-sensing grip on a peg
A. McNabb, A. Parshotam and G. Wake	109	Outputs and time lags for linear bioreactors

L. D. Flippen, Jr.	121	Polynomial-basis model reduction
I. Z. Milovanovic, E. I. Milovanovic and M. K. Stojcev	133	Matrix inversion algorithm for linear array processor
D. Gichev	143	An algorithm for routing messages between processing elements in a multiprocessor system which tolerates a maximal number of faulty links
M. Muraskin	149	Errata to "Alternate approach to no integrability field theory"
